How do we make the shift from grading practices that too often measure completion and compliance, to grading that supports learning and student mastery of content?

Hear from districts around the state who are tackling grading reform and reimagining assessment of student learning. Converse with colleagues on questions you want answered. Push your thinking as you listen to a principal whose school is making grading reform happen and why we need to pay attention to who Generation Z is if we hope to make the shift.

THINKSHOP DAY AT-A-GLANCE

» Opening Remarks

How Gen Z Will Impact the Way We Grade and Assess Students

» Facilitated Sessions

- “How do school leaders support grading reform in their schools?”
- “Redos and Retakes Done Right”
- “Implementing Mastery-Based Grading within the Traditional Grading System”

» “Unconference” Topics

Generate your own topic and join with colleagues to exchange best practices, solutions, and resources.

An unconference is an event where agenda topics are set by those who attend.
