

COMMUNICABLE/INFECTIOUS DISEASES

The Board recognizes that all children in Connecticut have a constitutional right to a free, suitable program of educational experiences. The Board will establish reasonable health requirements as prerequisites to admission or attendance including the requirement that students undergo physical examination prior to admission.

Where it can be medically established that a student suffers from a serious infectious disease and there is a significant risk of transmission of the disease to others due to the nature of the disease or personal characteristics of the student carrier, it may be appropriate to exclude the student from the regular classroom. The determination of exclusion of any student will be made on a case by case basis with the appropriate procedural due process safeguards. Where the risk of transmission is relatively low or appropriate procedures can be adopted to reduce the risk of transmission exclusion is not warranted.

A child with an infectious disease may be considered handicapped, if the child presents such physical impairment that limits one or more major life activities. Therefore, Section 504 of the Rehabilitation Act may apply. The parent/guardian or the school administration may make a referral for determination whether the student is handicapped and entitled to protection under Section 504. LEARN Standard 504 procedures will be implemented.* The student will be educated in the least restrictive environment.

*Based upon individual circumstances, special programming from a 504 Team or a special education Planning and Placement Team may be warranted. The student will be educated in the least restrictive environment.
